Surabaya, Indonesia (Open for Relocation)

Summary

Hi! I'm Deka Galang Permadi, a front-end and mobile developer with over 7 years of experience in creating user-centered digital experiences. During my time at Superapp.id, a leading social commerce platform, I specialized in pixel-perfect design, user engagement, WYSIWYG solutions, and code automation, ensuring efficiency and maintainability as development standards.

Work Experiences

Frontend Engineer

Apr 2025 - Present

PT. Digdaya Olah Teknologi Indonesia

Malang, Indonesia

- Achievement**
- Successfully migrated the internal package — including Storybook and a custom Ant Design library — from a monolithic structure to a monorepo architecture, improving scalability and maintainability.
 - Developed a global API error handling system, reusable UI components, and custom middleware to improve the project's reusability, maintainability, and scalability.

Tech Stack React.js, Vite, React Query, Zod, Zodios, Ant Design, Tailwind CSS, Typescript, Sentry, Figma, SonarQube, Jira

Software Engineer

July 2018 - Oct 2024

Superapp.id

Surabaya, Indonesia

- Achievement**
- Designed and implemented system design to ensure scalability and optimal performance.
 - Developed complex features such as vouchers, cart, and product filters to enhance UX.
 - Significantly improved development speed by implementing shared modules, reducing redundant code and improving maintainability.

Tech Stack Flutter, Next.js, Freezed, Bloc, Typescript, Tailwind, Zod, Zodios, Jira, Figma, Amplitude, React.js, Ant Design, SCSS, Firebase

Programmer

June 2017- Apr 2018

Twiscode

Surabaya, Indonesia

- Responsibility**
- Developed and implemented features based on client requests using Laravel.
 - Participated in team-client meetings to gather requirements and provide technical insights.

Tech Stack Laravel, PHP, Git, Mysql, phpMyAdmin
