About Me

Hi! I'm Deka Galang Permadi, a passionate front-end and mobile developer with over 6 years of experience in creating user-centered digital experiences. I always implement clean designs and intuitive interfaces, using modern technologies to make a positive impact.

Portofolio

- [SuperApp - Jaringan Agen](#)
- [Dashboard Internal Super](#)

Experience

Software Engineer

SuperApp (YC W18)

July 2018 - Oct 2024

As the first social commerce platform in Indonesia that is ISO 9001:2015 certified, SuperApp aims to solve economic inequality across cities for Indonesia's future economy. SuperApp is one of the top YC companies, which oversees the main feature, SuperAgen, an agent-led commerce that enables community leaders to become retailers within their communities.

- **Flutter and Next.js Development**

Actively involved in the development of a SuperApp using Flutter and an internal dashboard using Next.js. Created and implemented coding standards and project module imports.

- **Migration from Ionic to Flutter**

Migrated the application from Ionic to Flutter by redesigning the interface, rewriting code in Dart, and conducting testing to enhance performance and user experience.

- **Creating a Design System**

Create ready-to-use Flutter widgets from UI/UX in Figma according to established standards.

- **Product Development Collaboration**

Partnered with product managers in product development, including sprint planning, sprint grooming and task distribution.

Programmer

TwisCode

June 2017 - Apr 2018

As a full-stack developer, I developed features based on client requests using Laravel and attended meetings between the team and the client.
